Sam's Radio Hams Sunday Net

Net Control Operators Instructions and Script

INSTRUCTIONS FOR 2012: The pre-net check-in starts at 0830 Local time and will continue to 0900 on **7268.5 kHz**. The Net Control operator will also be using the **Condor Connection** for check-ins, and will also ask for any relays.

The Net Control Operators will determine if the conditions will allow continuing on 40 meters, or to QSY to 3921.0 kHz for the Formal Sunday Net. The Condor Connection may be used for relays. At 0900 the net will be officially opened and the Officers and Chairpersons Reports taken. After all reports are taken, the net operator will then take any late check-ins, and open the net for QSO conversation between members. *If the Sunday Net was primarily conducted on 40 meters*, then at 0930 operations should QSY to 7275.0 kHz (or 3921.0 kHz) for further QSOs.

Primary reason for the use of the **Condor Connection** is to get more member participation in our nets and make sure that everyone is heard even when experiencing poor HF band conditions.

-----Script-----

QST **QST**

This is K6SRH, SAM'S RADIO HAMS SUNDAY NET that meets at 0900 local time every Sunday. Your Net Control today is (your call sign). My name is _____ and I am located in _____. Sam's Radio Hams is a chapter of the Good Sam Club, and is affiliated with ARRL. We are a group of Amateurs who also hold an interest in RV Camping and we schedule monthly campouts. The Chapter has approximately 50 members and welcomes inquiries from potential new members. Interested parties should check our Web Site at www.srhams.org, or e-mail at n6isy@arrl.net Please hold further check-ins until called for. Are there any EMERGENCIES ON FREQUENCY that are in need of assistance? (Pause) Are there any RELAYS? (Pause) Not hearing anyone, the chapter officers and chairpersons are:
